PROFESSIONAL SUMMARY

Aspiring AI & Machine Learning Student with hands-on experience in developing intelligent applications using Machine Learning, Deep Learning, Computer Vision, and Full-Stack Web Development. Skilled in designing AI-powered solutions, UI&UX Desingner building RESTful applications, and working with modern development frameworks. Passionate about solving real-world problems through scalable software and continuously learning emerging technologies.

EDUCATION

Bachelor of Technology (B.Tech) – Artificial Intelligence & Data Science CARE College of Engineering - Trichy	CGPA-7.26 Sep 2023 - Present
HSC (12th) Montfort Matriculation Higher Secondary School	69.16% (2022–2023)
HSC (10th) Montfort Matriculation Higher Secondary School	All Pass (2020–2021)

CERTIFICATIONS

- Full Stack Development – NoviTech R&D Pvt Ltd
- Data Analytics Job Simulation – Deloitte
- Data Analytics Course – IBM
- Gen AI Course – AWS Academy
- AI Course – IBM
- Cloud Foundation – AWS Academy
- Python (Basic) – HackerRank
- Problem Solving (Basic) – HackerRank
- SQL (Basic) – HackerRank
- Machine Learning – AWS Academy

TECHNICAL SKILLS

- **Programming Languages: Python**, Java, SQL
- **AI & Machine Learning: Machine Learning**, **Deep Learning**, **Computer Vision**, **Natural Language Processing (NLP)**, Predictive Analytics
- **Frameworks & Libraries: TensorFlow, Keras, Scikit-learn, OpenCV, NumPy, Pandas, Matplotlib, Flask**
- **Web Technologies:** HTML5, CSS3, JavaScript, React.js, Node.js, REST APIs
- **Databases:** MySQL, MongoDB
- **Developer Tools:** Git, GitHub, Visual Studio Code, Jupyter Notebook, Google Colab
- **Core Computer Science:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Computer Networks (CN)

PROJECTS

AI-Powered Facial Emotion Recognition

Technologies: Python, TensorFlow, Keras, OpenCV, Flask
Developed a real-time facial emotion recognition system using deep learning and computer vision by training and evaluating a Convolutional Neural Network (CNN) on the FER-2013 dataset. Implemented OpenCV for real-time face detection and integrated the trained model with a Flask-based web application to perform live emotion recognition through a webcam.

EcoVert – Smart Plant Monitoring System

Technologies: Machine Learning, Python, IoT, Arduino
Developed an AI-powered smart plant monitoring system that uses IoT sensors and Arduino to collect real-time data on soil moisture, temperature, and humidity. Applied machine learning techniques to analyze environmental conditions, enabling intelligent plant health monitoring and supporting automated, data-driven plant care for sustainable agriculture.

Gestro – Offline AI Sign Language Interpreter *(In Development)*

Technologies: **OpenCV, TensorFlow, Computer Vision**
Developing an offline computer vision system for real-time sign language recognition to enable communication without internet access.

INTERNSHIP

Full Stack Development – Marcello Tech Pvt Ltd
- Developed responsive web applications using modern front-end and back-end technologies.
- Built and integrated RESTful APIs for seamless client-server communication.
- Worked with databases to perform CRUD operations and optimize data management.
- Collaborated with the development team using Git for version control and project management

Java – Marcello Tech Pvt Ltd
- Developed object-oriented applications using Java and core programming concepts.
- Implemented file handling, exception handling, and collection frameworks in projects.
- Worked with JDBC to connect Java applications with relational databases.
- Debugged, tested, and optimized Java programs to improve performance and reliability.

Data Warehousing Intern – Aishvel Infotech Pvt Ltd
- Assisted in designing and maintaining data warehouse solutions for business reporting.
- Performed ETL (Extract, Transform, Load) processes to integrate data from multiple sources.
- Wrote SQL queries to clean, transform, and analyze large datasets.
- Supported data validation and reporting to ensure data accuracy and consistency.

AI/ML Developer Intern – Kuganmahe Solutions Pvt Ltd
- Developed machine learning models for data analysis and predictive applications.
- Preprocessed and analyzed datasets using Python, Pandas, and NumPy.
- Evaluated model performance using appropriate metrics and optimization techniques.
- Collaborated with the team to deploy AI/ML solutions and document project workflows.

LEADERSHIP ROLES
- Treasurer – ECO CARE Club (2026–27)
- Secretary– ECO CARE Club (2025–26)
- Joint Secretary– ECO CARE Club (2024–25)
- WorkForce – Entrepreneurship Development Cell
- NSS Volunteer (2023–25)
- Executive Member – Full Stack & Data Analytics Club (2025–27)
